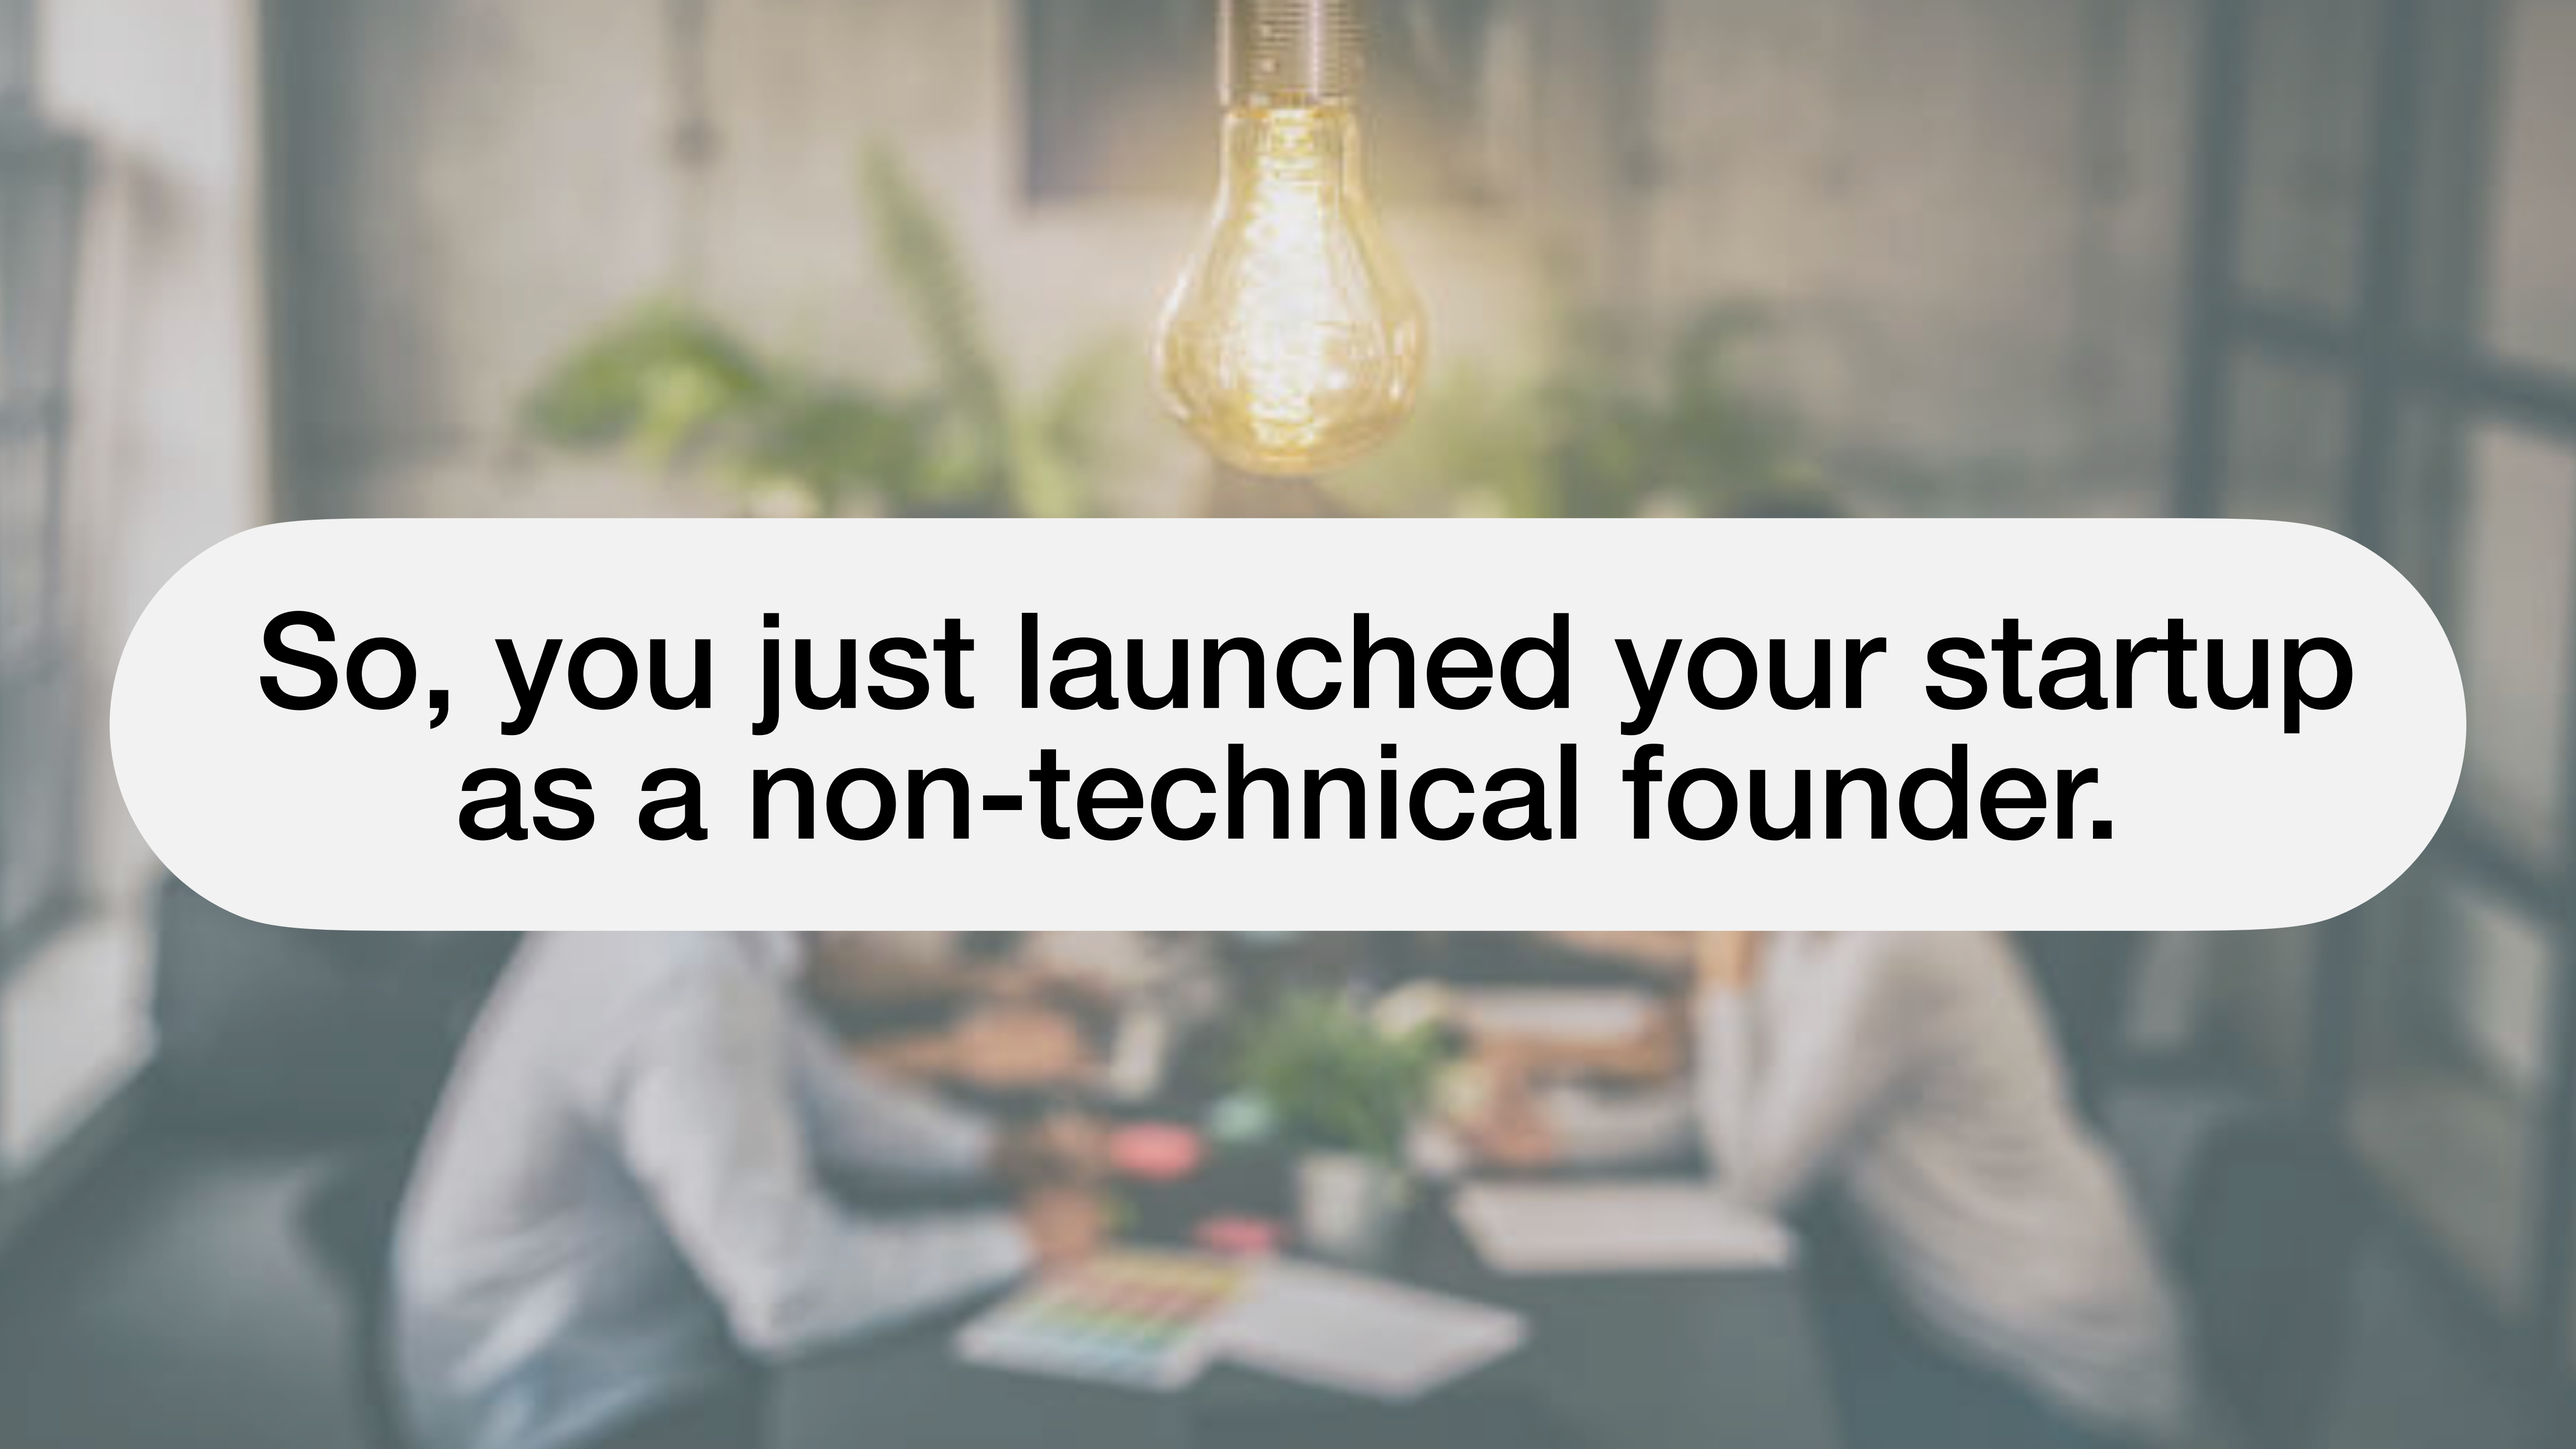
RapidAnalysis

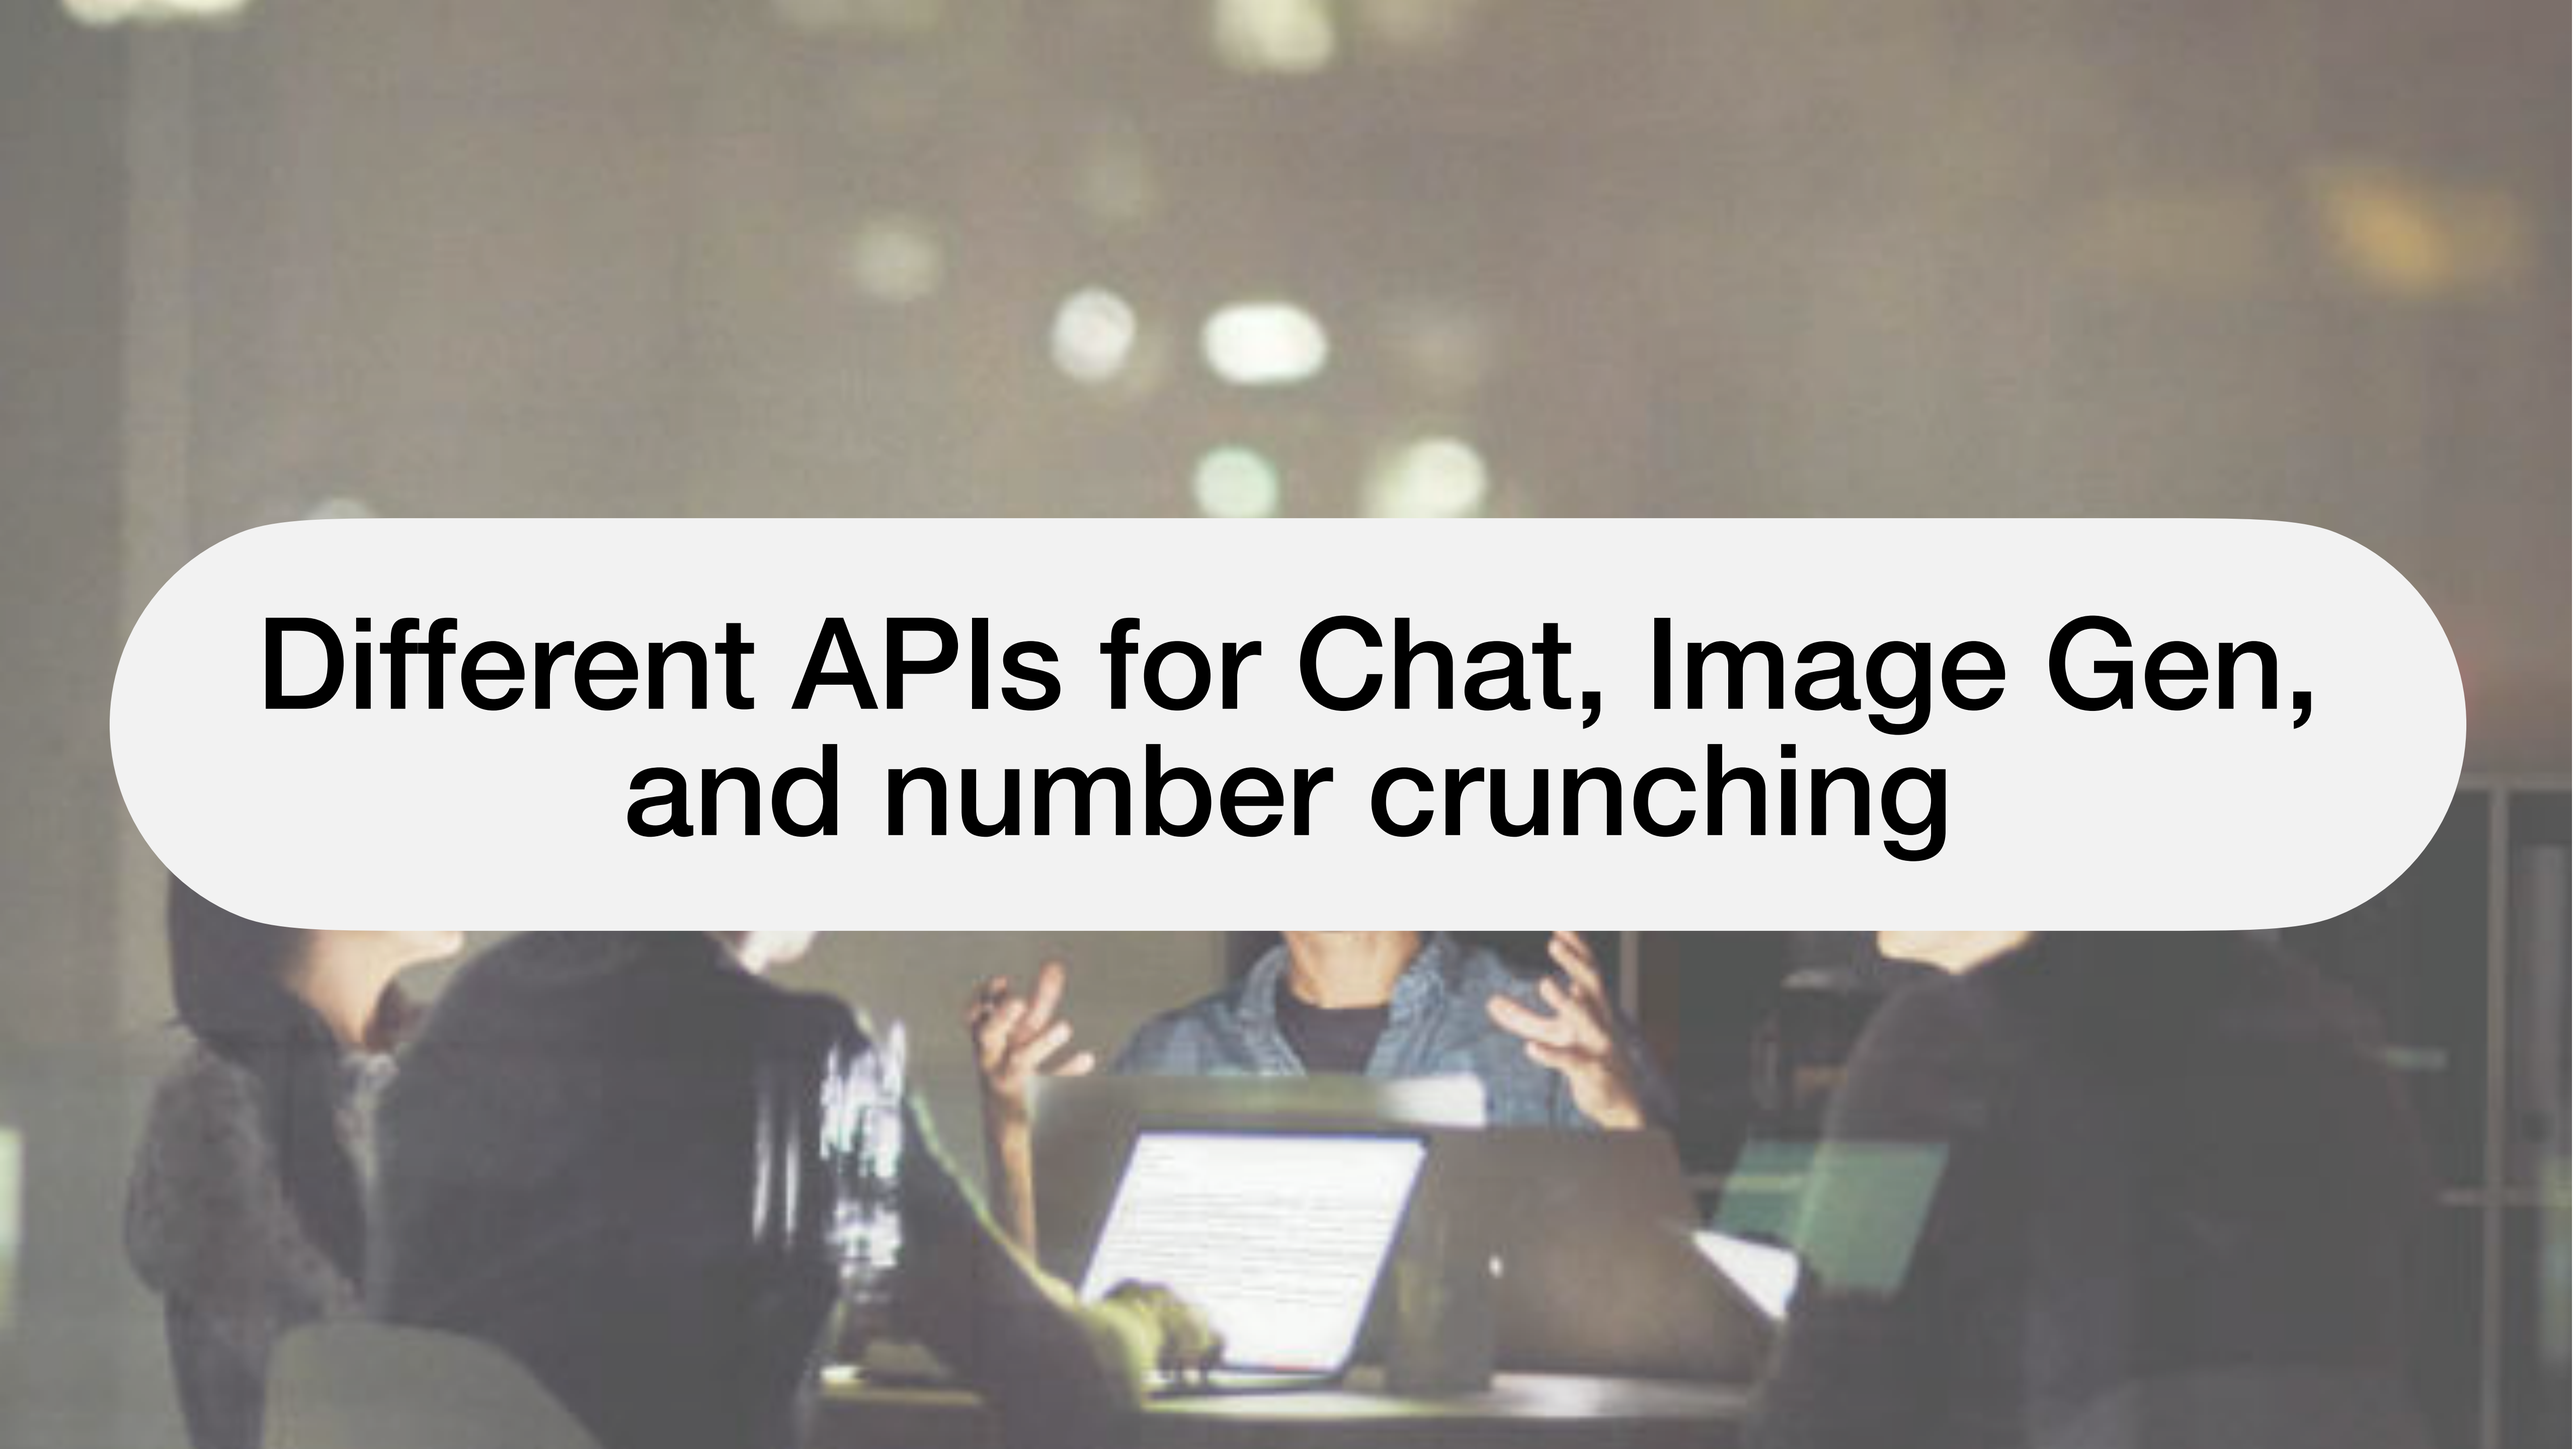
Smart Utilities for low-code AI implementation

Robert A. Newport - October 25, 2023



So, you just launched your startup as a non-technical founder.

But, AI is turning out to be expensive and tough to integrate.



Different APIs for Chat, Image Gen, and number crunching

Well what if you could solve all you AI needs with one utility?

RapidAnalysis is a collection of quick and easy AI driven utilities including:

- LLM Chat with RAG
- Summarisation
- Image Classification
- Text Recognition
- And more…

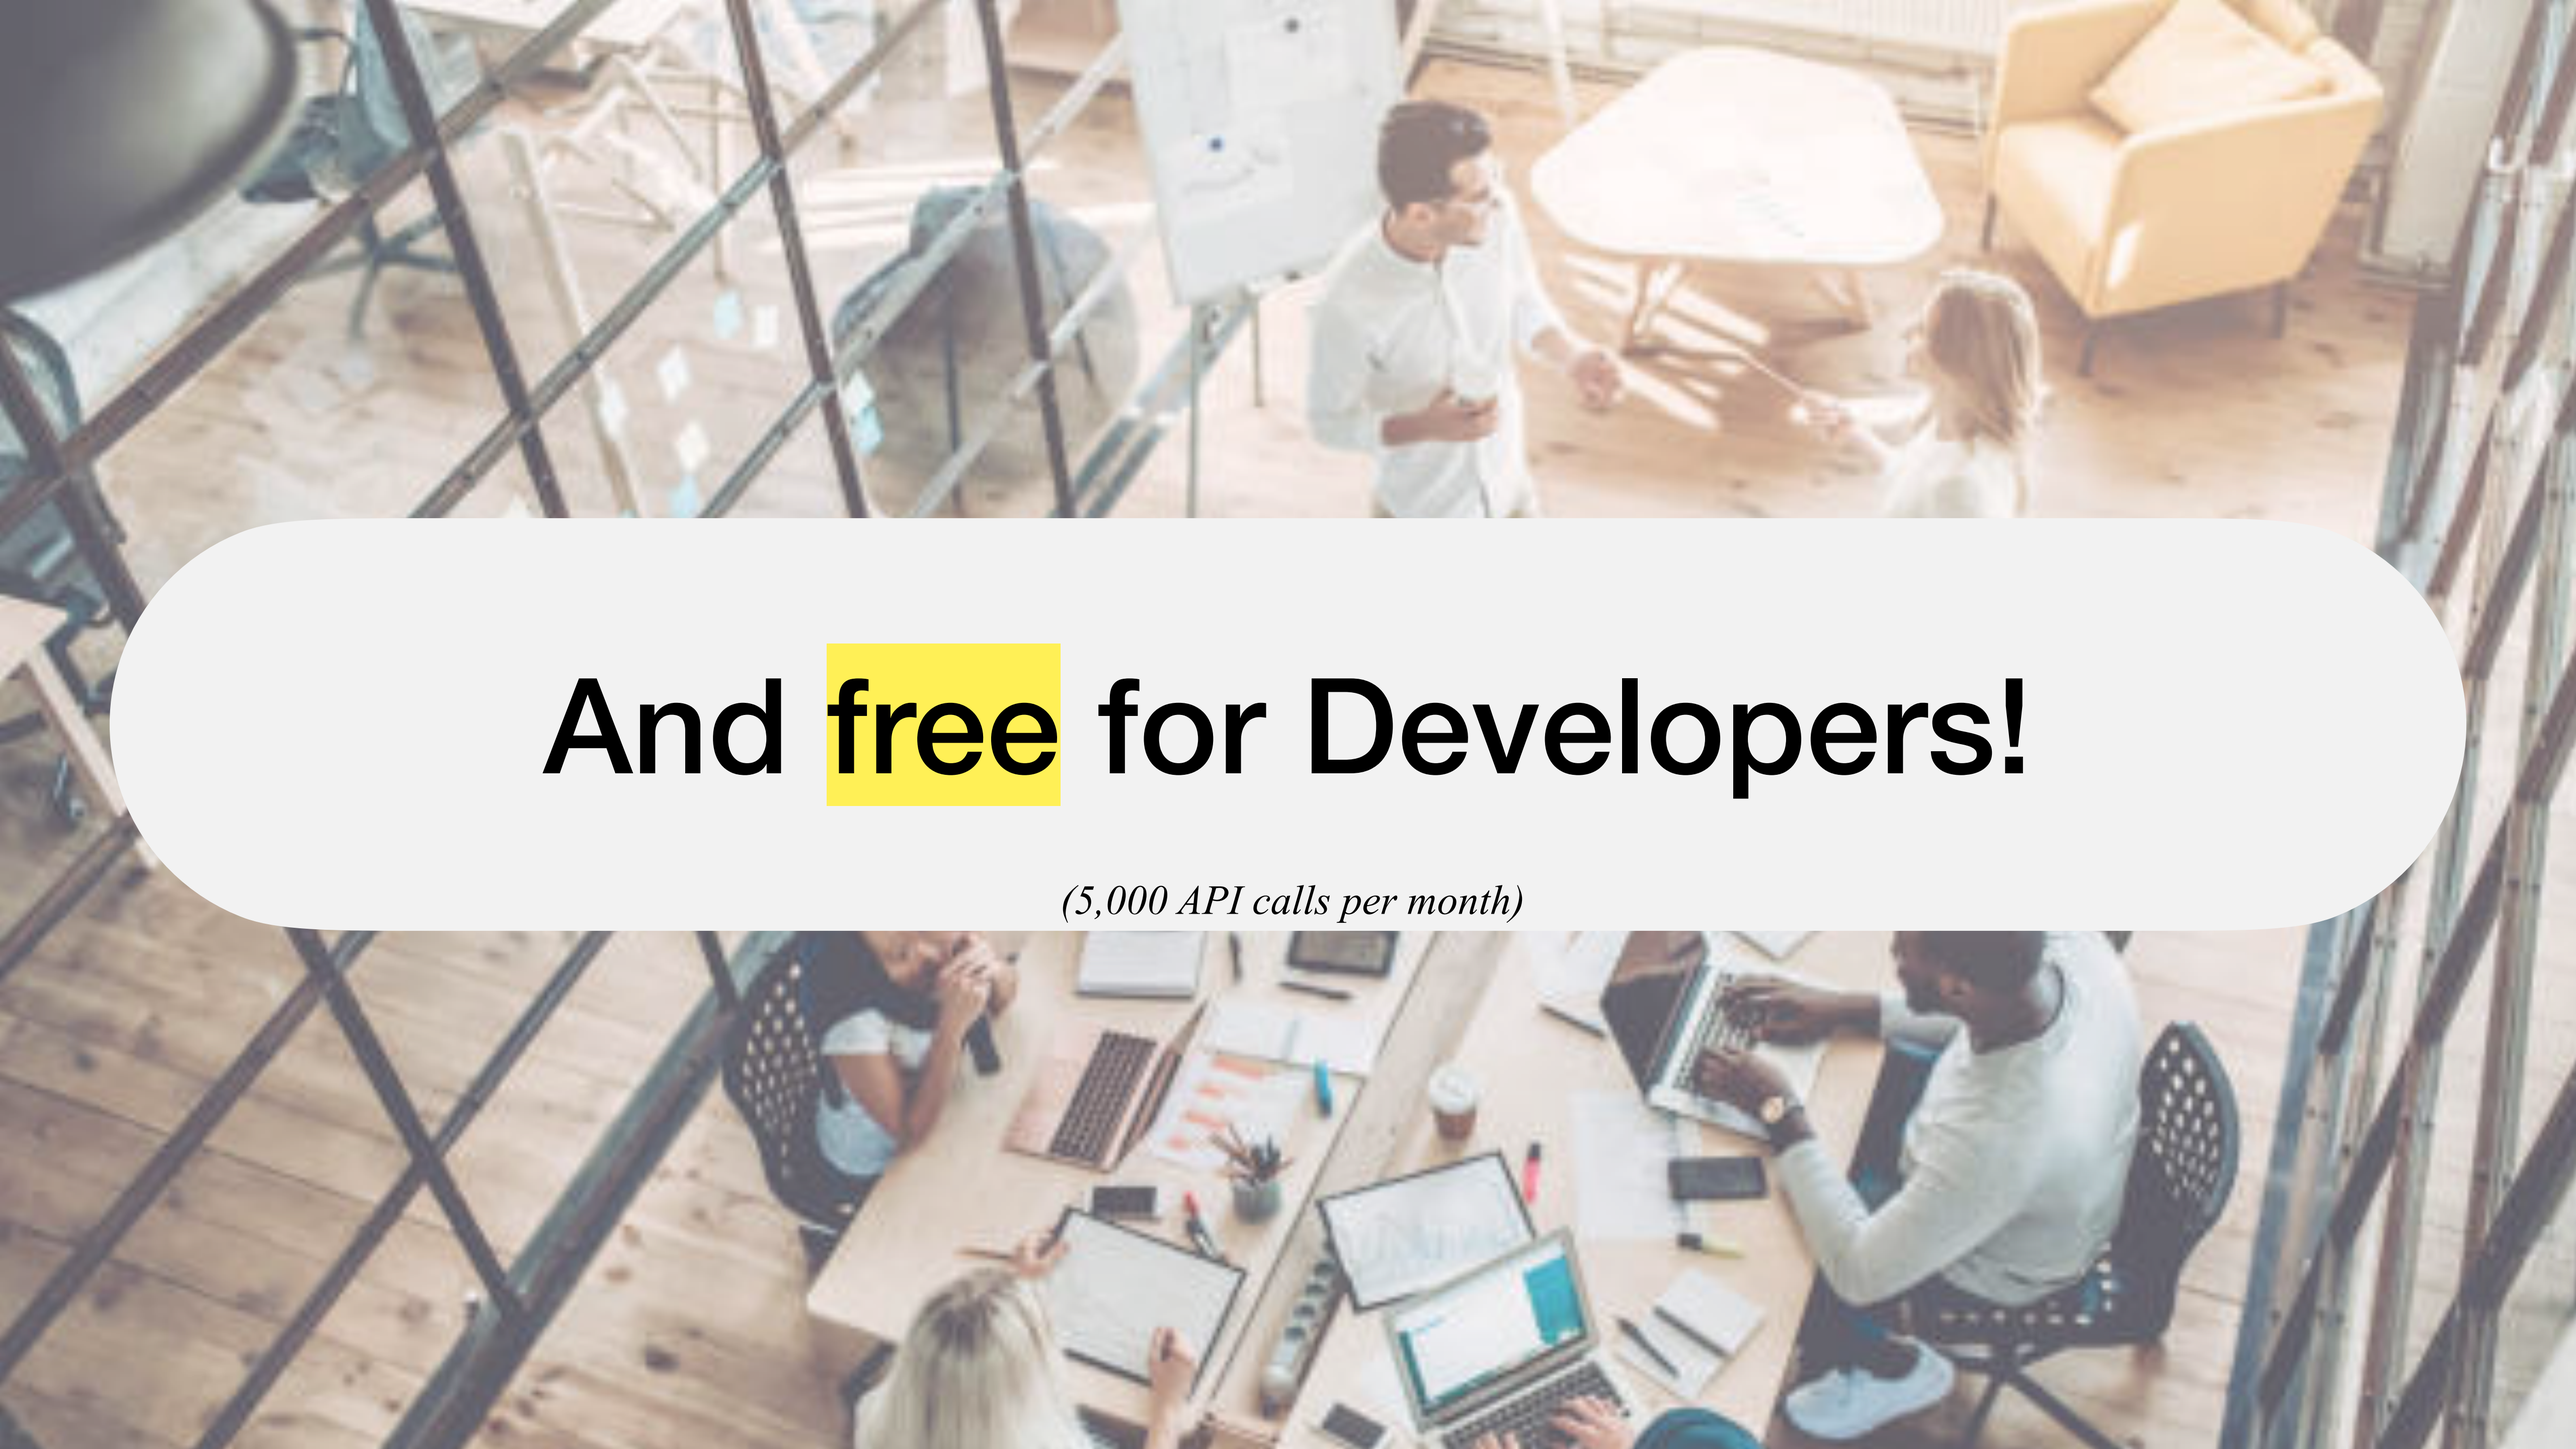
We plan to introduce more AI driven utilities in the near future including:

- Image processing
- Text to image generation
- Text translation
- And more…

And we won’t stop introducing new utilities…ever!

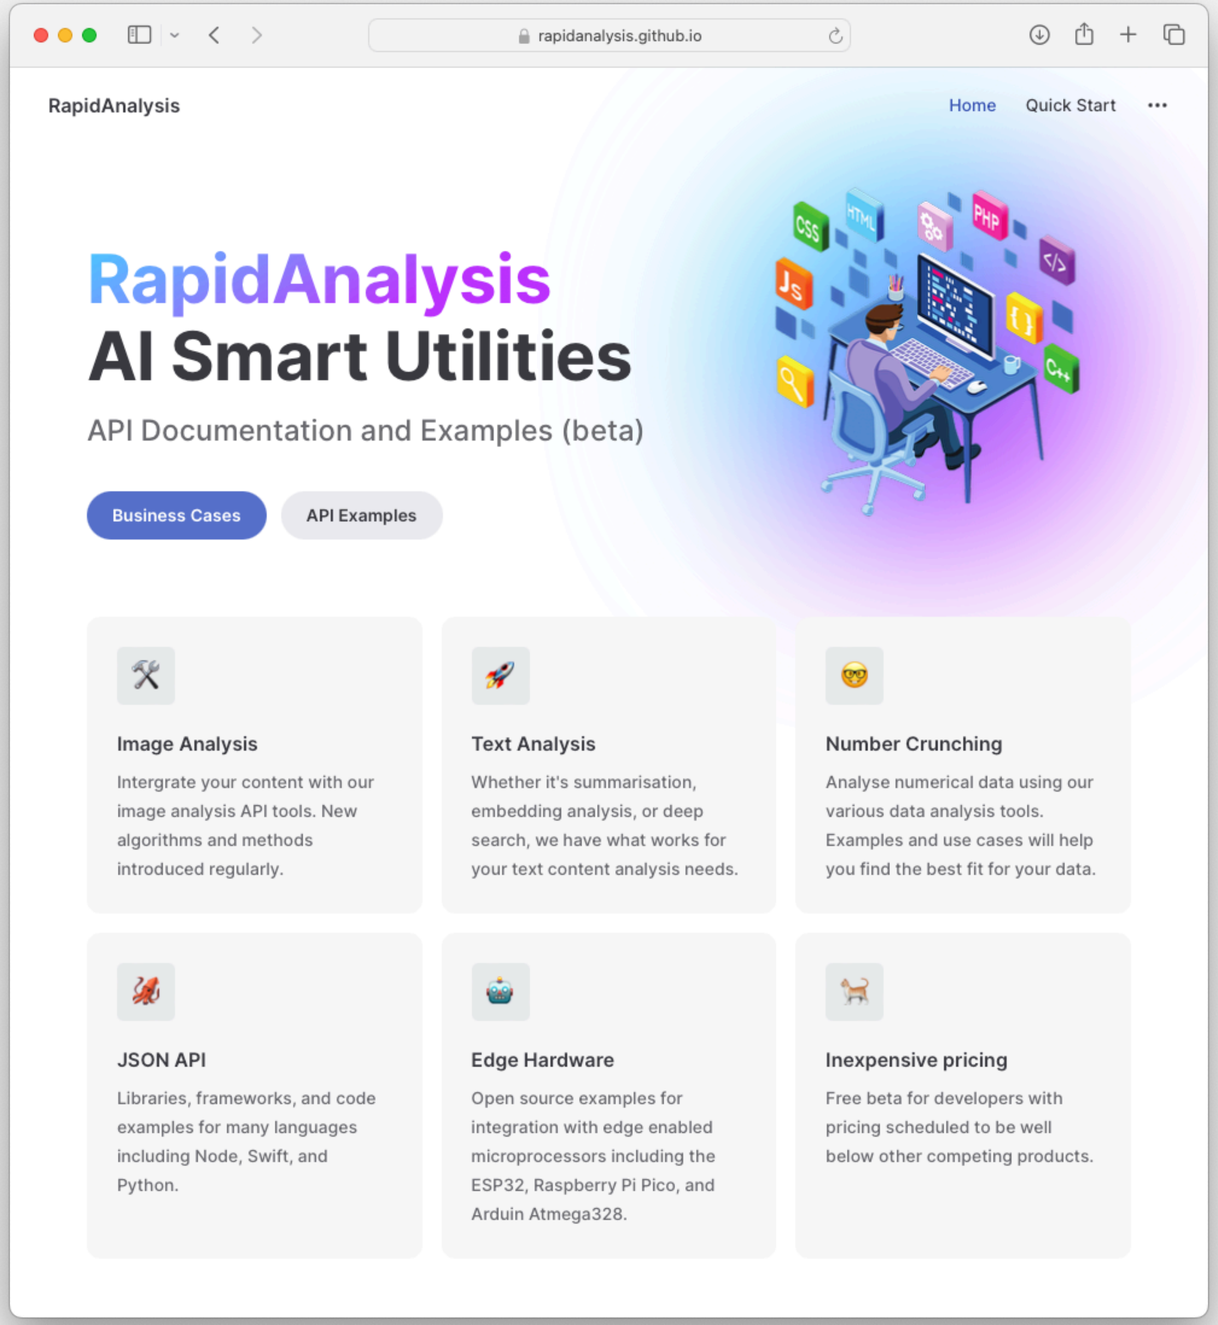
All for the low price of $10 a month!

(Price subject to change up or down in final product)



And free for Developers!

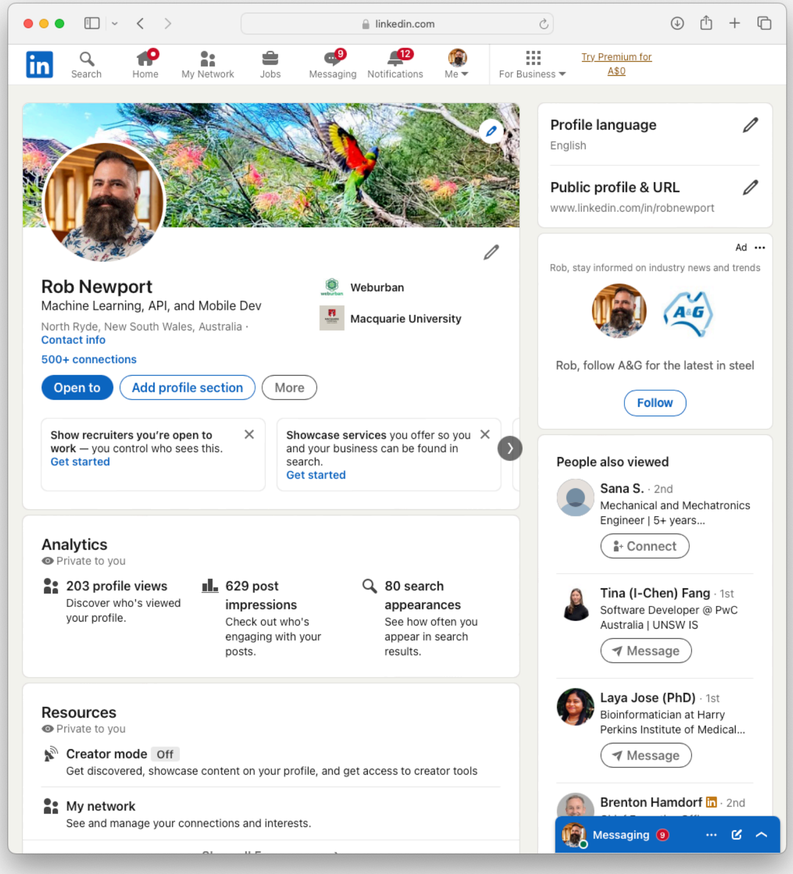
(5,000 API calls per month)



It’s live right now: https://rapidanalysis.github.io

MACQUARIE University | INCUBATOR

How did I get here?



My background includes 20+ years in the US startup ecosystem.

I have co-authored almost a dozen patents.

Primary author on several ML papers, including one featured at NeurIPS 2022.

Principal tech lead in many startups.

PhD in computational neuroscience.

The Big Ask – I need help with:

Adoption & Engagement

PR & Marketing

Strategic Sales
